

TAKE CARE OF YOUR PROSTHETIC LIMB

And **increase** its life span

Always wear footwear

Walking barefoot can cause your prosthetic foot to break faster.

Handle with **care**

Wipe your prosthetic limb clean with a damp cloth and dry thoroughly to avoid infection. Treat with care to ensure its long life.

Keep away from **fire**

Extreme heat can cause your prosthetic limb to melt or lose shape.

Do not wear **in shower**

It is not safe to wear the prosthetic limb, without footwear, on slippery surfaces as you may fall.
